*About the Program*

**2011 Corporate Recovery, Consumer Caution & Political Confusion:  
 Hold on to your seats and your money!**

What can we expect from a year of corporate enrichment, Main Street muddling, consumer concern, and political dysfunction? How can we reconcile record corporate profits with ongoing massive unemployment? Can we maintain government spending, will the bailouts return or are we headed toward private sector investment as the driver of the recovery? This panel will focus on trends and related opportunities, which are challenging to decipher as a result of prevailing economic and political mixed signals.

**Current Confirmed Speakers:**

- Larry J. Kosmont, President & CEO, Kosmont Companies
- Dr. Mark Schniepp, Director, California Economic Forecast
